CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Project Number(s)/Environmental Log Number/Title:

TM 5362RPL, Log No. 04-08-010; Homeland Estates

2. Lead agency name and address:

County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666

- 3. a. Contact Flores Bishop, Planner
 - b. Phone number: (858) 495-5241
 - c. E-mail: flores.bishop@sdcounty.ca.gov.
- 4. Project location:

The project site is in the North County Metropolitan Subregional Planning Area and is bounded on the west by Miller Avenue, to the east by Alexander Drive, to the south by Clarence Street, and on the north by residences.

Thomas Brothers Coordinates: Page 1149, Grid J/1

5. Project sponsor's name and address:

Standard Pacific, 5750 Fleet Street, Suite 200, Carlsbad, CA 92008

6. General Plan Designation

Community Plan: North County Metropolitan Subregional Plan

Land Use Designation: (1) Residential

Density: 1 du/1, 2, or 4 acres

7. Zoning

Use Regulation: A70 – Limited Agriculture

Density: 1 du/acre

Special Area Regulation: NA

8. Description of project (Describe the whole action involved, including but not limited to later phases of the project, and any secondary, support, or off-site features necessary for its implementation):

The project proposes to subdivide 11.87 acres into nine residential lots, with seven of the lots taking access from a to-be-named private road off of Miller Avenue and two taking access directly from Alexander Drive.

- 2 -

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

The project site is adjacent to residences on the north and south, vacant residential land and residences to the east and agricultural uses to west.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	<u>Agency</u>
County Right-of-Way Permits	County of San Diego
Construction Permit	
Excavation Permit	
Encroachment Permit	
Grading Permit	County of San Diego
Improvement Plans	County of San Diego
Septic Tank Permit	County of San Diego
Annexation to a City or Special District	Local Agency Formation Commission (LAFCO)
Air Quality Permit to Construct	Air Pollution Control District (APCD)
General Construction Storm Water	RWQCB
Permit	
Water District Approval	Rincon Del Diablo Municipal Water
• •	District and City of Escondido
School District Approval	Escondido Union and Escondido Union High School Districts

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental factors checked below would be potentially affected by this project and involve at least one impact that is a "Potentially Significant Impact" or a "Potentially Significant Impact Unless Mitigation Incorporated," as indicated by the checklist on the following pages.

INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, potentially significant unless mitigation incorporated, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Potential Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Potentially Significant Unless Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
 - a) The significance criteria or threshold, if any, used to evaluate each question; and
 - b) The mitigation measure identified, if any, to reduce the impact to less than significance

	Initial Study, 32RPL, Log No.04-08-010	- 5 -	August 24, 2006
	THETICS Would the project: Have a substantial adverse effect of	on a scenic	vista?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
valued highway Maggie scenic v site is lo	viewsheds, including areas desigr ys or County designated visual res Loy on April 13, 2004, the propos vista and will not change the comp	nated as off sources. Based project in position of a grange as area. The	ased on a site visit completed by is not located near or visible from a in existing scenic vista. The project refore, the proposed project will not
,	Substantially damage scenic resound transplayed in Substantially damage scenic building and historic building to the second seco		ding, but not limited to, trees, rock tate scenic highway?
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from CalTrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by Maggie Loy on April 13, 2004, the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The project site is located amidst residential and vacant residential lots. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

c)	Substantially degrade the existing value surroundings?	visual char	acter or quality of the site and its
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

- 6 -

Discussion/Explanation:

Less Than Significant Impact: Visual character is the objective composition of the visible landscape within a viewshed. Visual character is based on the organization of the pattern elements line, form, color, and texture. Visual character is commonly discussed in terms of dominance, scale, diversity and continuity. Visual quality is the viewer's perception of the visual environment and varies based on exposure, sensitivity and expectation of the viewers. The existing visual character and quality of the project site and surrounding can be characterized as residential to the north, east and south, and intensive agricultural to the west. The property is primarily on a gentle west-facing slope with a rise of approximately 100 feet over a distance of 1,200 feet. Travelers on Miller Avenue, a two lane public road and bordering the project on the west, will look up at the subdivision. The view of the homes and landscaping will shield any views of artificial slopes, which are a maximum of 15 feet high. One residence would be visible from Alexander Drive, a two lane public road to the east of the project and at the highest point of the property. Otherwise, all views are from existing residences.

The proposed project is a residential subdivision. The project is compatible with the existing visual environment's visual character and quality for the following reasons: The surrounding area contains residences of a similar scale on land with similar landform alteration as the proposed project on three sides. Therefore the project will be compatible with the visual character of the area. Slope height is within the less than significant range of 15 feet or less and lot sizes of 1 acre will be in character with the rural feel of the area. Landform alteration will require a volume of 10,100 cubic yards of cut and 22,700 cubic yards of fill, for a net import of 12,600 cubic yards of material over 11.87 acres.

The project will not result in cumulative impacts on visual character or quality because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the viewshed surrounding the project and will not contribute to a cumulative impact for the following reasons: The project is compatible with the residential visual character of the area and it will not degrade the overall visual quality of this unincorporated area adjacent to the City of Escondido. The lot design allows for a natural break of residential to the east of Miller Avenue and intensive agriculture to the west. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area.

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		

Less Than Significant Impact: The project site has land designated as Farmland of Statewide Importance. As a result, the proposed project was reviewed by the Department of Planning and Land Use Agricultural Specialist and was determined not to have significant adverse project or cumulative level impacts related to the conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Farmland of Local Importance to a non-agricultural use for the following reasons: The project site is surrounded on all sides by a variety of lot sizes, many of which are 1 acre. The site itself is not currently being farmed. Therefore, no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance or Farmland of Local Importance to a non-agricultural use will occur as a result of this project.

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

Less Than Significant Impact: The project site and surrounding area within radius of one mile have land designated as Farmland of Statewide Importance. As a result, the proposed project was reviewed by the Department of Planning and Land Use Agricultural Specialist and was determined not to have significant adverse impacts related to the conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance or Farmland of Local Importance to a non-agricultural use for the following reasons: The project site is surrounded on all sides by a variety of lot sizes, many of which are 1 acre. The site itself is not currently being farmed. Therefore, no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Farmland of Local Importance to a non-agricultural use will occur as a result of this project.

<u>III. AIR QUALITY</u> -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a) Conflict with or obstruct implementation of the San Diego Regional Air Quality Strategy (RAQS) or applicable portions of the State Implementation Plan (SIP)?

CEQA Initial Study, TM 5362RPL, Log No.04-08-010	- 9 -	August 24, 2006
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:		
Less Than Significant Impact: The properties anticipated in SANDAG growth projection Operation of the project will not result in pollutants listed in the California Ambient as identified by the California Air Resourant expected to conflict with either the Raconsistent the SANDAG growth projection project will not contribute to a cumulative	ns used in de emissions of t Air Quality S ces Board. A AQS or the S ons used in the ely considera	evelopment of the RAQS and SIP. It significant quantities of criteria Standards or toxic air contaminants As such, the proposed project is SIP. In addition, the project is the RAQS and SIP, therefore, the ble impact.
b) Violate any air quality standard or projected air quality violation?	contribute s	ubstantially to an existing or
Potentially Significant ImpactPotentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:		

In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

Less Than Significant Impact: The project proposes a subdivision of 11.87 acres into nine residential lots. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in 108 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

,	Result in a cumulatively considerable newhich the project region is non-attainment ambient air quality standard (including requantitative thresholds for ozone precur	ent und	der an applicable federal or state
;		eleasi	ng emissions which exceed
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM₁₀) under the CAAQS. O₃ is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM₁₀ in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Less Than Significant Impact: Air quality emissions associated with the project include emissions of PM₁₀, NO_x and VOCs from construction/grading activities, and VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM₁₀ and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 108 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air

Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM₁₀.

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O₃ precursors.

Discussion/Explanation:

Refer to the attached Ordinance Compliance Checklist dated December 14, 2005 for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).

V. CULTURAL RESOURCES Would the project:			
a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5?			
	Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact
Ш	Mitigation Incorporated	V	No Impact
Discus	sion/Explanation:		
No Impact: Based on an analysis of records and two prior surveys of the property by archaeologist Clifford (1998) and Keller (1992), it has been determined that there are no impacts to historical resources because they do not occur within the project site.			
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to 15064.5?			
	Potentially Significant Impact		Less than Significant Impact
\checkmark	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Potentially Significant Unless Mitigation Incorporated: Based on an analysis of records and two prior surveys of the property by archaeologists Clifford (1998) and Keller (1992), it has been determined that the project site does not contain any surface archaeological resources. However, because the previous surveys were conducted over five years ago, and because of the presence of several prehistoric sites in the vicinity of the current project, including one site in the parcel directly to the north, the project will be conditioned to have archaeological monitors present during the grading portion of the proposed project to be on the lookout for subsurface cultural resources.

c) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

	nitial Study, PRPL, Log No.04-08-010	- 15 -	August 24, 2006

iii. Seismic-related	ground failure, in	cluding	g liquefaction?
☐ Potentially Significant	Impact		Less than Significant Impact
Potentially Significant Mitigation Incorporate		\checkmark	No Impact

Discussion/Explanation:

- 17 -

No Impact: The geology of the project site is identified as Cretaceous plutonic fractured crystalline rock. This geologic environment is not susceptible to ground failure from seismic activity. In addition, the site is not underlain by poor artificial fill or located within a floodplain. Therefore, there will be no impact from the exposure of people to adverse effects from a known area susceptible to ground failure.

	iv. Landslides?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
geolog nas a l	No Impact: The site is not located within a landslide susceptibility zone. 	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less Than Significant Impact: According to the Soil Survey of San Diego County, the soils on-site are identified as Fallbrook sandy loam (FaD2 and FaE2), 9% to 15% slopes and 15% to 30% slopes, and Ramona sandy loam (RaC), 5% to 9% slopes, that have a soil erodibility rating of "severe" as indicated by the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. However, the project will not result in substantial soil erosion or the loss of topsoil for the following reasons:

- The project will not result in unprotected erodible soils; will not alter existing drainage patterns; is not located in a floodplain, wetland, or significant drainage feature; and will not develop steep slopes.
- The project has prepared a Storm Water Management Plan dated July 20, 2005, prepared by REC Consultants, Inc. The plan includes the following Best Management Practices (BMPs) to ensure sediment does not erode from the project site: potentially include, during construction, silt fence, fiber rolls, street sweeping/vacuuming, storm drain inlet protection, stockpile/solid waste/concrete waste management, stabilized construction entrance/exit, dewatering/paving/grinding operations, vehicle/equipment maintenance areas, erosion control

mats/spray-on applications, spill prevention/control, desilting basin, gravel bag berm, sandbag barrier, water conservation practices, and revegetation of disturbed areas. Additionally, post-construction BMPs proposed are minimizing impervious areas, landscaping of slopes and common areas, monitoring of irrigation system, riprap at storm drain outfalls to reduce velocities, homeowner education, warning stenciled at storm drain inlets, bio-swales and hydro-cartridge filtration.

 The project involves grading. However, the project is required to comply with the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING). Compliance with these regulations minimizes the potential for water and wind erosion.

Due to these factors, it has been found that the project will not result in substantial soil erosion or the loss of topsoil on a project level.

In addition, the project will not contribute to a cumulatively considerable impact because all the of past, present and future projects included on the list of projects that involve grading or land disturbance are required to follow the requirements of the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING); Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); and County Storm Water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

,	Will the project produce unstable geolog impacts resulting from landslides, latera collapse?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project will result in site disturbance and grading for pads and roadways. However, County staff geologist Jim Bennett has reviewed the project and determined that unstable geological conditions, either on-site or off-site, are unlikely to result from the action. The proposed project is consistent with the geological formations underlying the site. For further information refer to VI Geology and Soils, Question a., i-iv listed above.

CEQA Initial Study, TM 5362RPL, Log No.04-08-010	- 19 -	August 24, 2006
d) Be located on expansive soil, as of Code (1994), creating substantial		able 18-1-B of the Uniform Building or property?
☐ Potentially Significant Impact		Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact
Discussion/Explanation:		
The project does not contain expansive significantly Building Code (1994). The soils on-site slopes, and 15 to 19% slopes, as well as These soils have a shrink-swell behavior or property. If for the San Diego Area, prepared
e) Have soils incapable of adequatel alternative wastewater disposal sy disposal of wastewater?		
☐ Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated		No Impact
D		

Discussion/Explanation:

Less Than Significant Impact: The project proposes to discharge domestic waste to onsite wastewater systems (OSWS), also known as septic systems. The project involves a septic system located on each of the nine lots. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards, including the Regional Basin Plan and the California Water Code. California Water Code Section 13282 allows RWQCBs to authorize a local public agency to issue permits for OSWS "to ensure that systems are adequately designed, located, sized, spaced, constructed and maintained." The RWQCBs with jurisdiction over San Diego County have authorized the County of San Diego, Department of Environmental Health (DEH) to issue certain OSWS permits throughout the County and within the incorporated cities. DEH has reviewed the OSWS layout for the project pursuant to DEH, Land and Water Quality Division's, "On-site Wastewater Systems: Permitting Process and Design Criteria." DEH approved the project's OSWS on March 16, 2005. Therefore, the project has soils capable of adequately supporting the use of septic tanks or alternative wastewater disposal systems as determined by the authorized, local public agency. In addition, the project will comply with the San Diego County Code of Regulatory Ordinances, Title 6, Div. 8, Chap. 3, Septic Tanks and Seepage Pits.

/II. HAZARDS AND HAZARDOUS MATERIALS Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, storage, use, or disposal of hazardous materials or wastes?				
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporation	$\overline{\checkmark}$	No Impact	
Discus	sion/Explanation:			
becaus Hazard	No Impact : project will not create a significant hazard to the public or the environment because it does not propose the storage, use, transport, emission, or disposal of Hazardous Substances, nor are Hazardous Substances proposed or currently in use in the immediate vicinity.			
	Create a significant hazard to the public foreseeable upset and accident condition materials into the environment?		•

Discussion/Explanation:

No Impact: The project is not located within one-quarter mile of and existing or proposed school. Therefore, the project will not have any effect on an existing or proposed school.

	Initial Study, - : 62RPL, Log No.04-08-010	21 -	August 24, 2006	
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	ssion/Explanation:			
Hazard	pact: The project is not located on a dous Waste and Substances sites list n 65962.5.			
e)	e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?			
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact	
Discus	ssion/Explanation:			
No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports; or within two miles of a public airport. Also, the project does not propose construction of any structure equal to or greater than 150 feet in height, constituting a safety hazard to aircraft and/or operations from an airport or heliport. Therefore, the project will not constitute a safety hazard for people residing or working in the project area.				
f)	f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?			
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact	
Discussion/Explanation:				

No Impact: The proposed project is not within one mile of a private airstrip. As a result, the project will not constitute a safety hazard for people residing or working in the

project area.

response plan or emergency evacuation plan? ☐ Potentially Significant Impact ablaLess than Significant Impact Potentially Significant Unless No Impact Mitigation Incorporated

August 24, 2006

Discussion/Explanation:

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

OPERATIONAL AREA EMERGENCY PLAN: i.

Less Than Significant Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY ii. RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE iv. RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

DAM EVACUATION PLAN V.

August 24, 2006

No Impact: The Dam Evacuation Plan will not be interfered with because the project is located outside a dam inundation zone.

, ,	Expose people or structures to a significe wildland fires, including where wildlands where residences are intermixed with w	are a	adjacent to urbanized areas or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		
No Impact: The proposed project is completely surrounded by urbanized areas, and/or irrigated lands and there are no adjacent wildland areas. Also, a Fire Service Availability Letter dated January 19, 2006 and conditions dated January 19, 2006, revised March 21, 2006, have been received from the City of Escondido Fire Department by way of a contract with the Rincon Del Diablo Municipal Water District. Pursuant to the Fire Department conditions, REC Consultants, Inc. has prepared a Fire Protection Plan which provides for four residential hydrants, as follows: one located off of Alexander Drive to service Lots 8 and 9 and capable of delivery 1, 500 GPM with a minimum of 20 psi residual pressure and three located on "Street A," one on the north side and two on the south side. Therefore, based on the location of the project; review of the project by County staff; and through compliance with the Rincon Del Diablo Municipal Water District in contract with the City of Escondido Fire Department's conditions, it is not anticipated that the project will expose people or structures to a significant risk of loss, injury or death involving hazardous wildland fires.			

i)	Propose a use, or place residents adjacent to an existing or reasonably
	foreseeable use that would substantially increase current or future resident's
	exposure to vectors, including mosquitoes, rats or flies, which are capable of
	transmitting significant public health diseases or nuisances?

Potentially Significant Impact		Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact

Discussion/Explanation:

No Impact: The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. artificial lakes, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Moreover, based on a site visit conducted by Maggie Loy on April 13, 2004, there is limited horsekeeping on adjacent properties;

- 24 -

however, there are no large equestrian facilities or the other types of uses mentioned earlier on adjacent properties. Therefore, the project will not substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies.

VIII. HYDROLOGY AND WATER QUALITY -- Would the project: a) Violate any waste discharge requirements? □ Potentially Significant Impact □ Potentially Significant Unless Mitigation Incorporated □ No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes nine residential lots which requires an NPDES permit associated with general construction activities. The project applicant has provided a copy of a Stormwater Management Plan, which demonstrates that the project will comply with all requirements of water quality protection. The project site proposes and will be required to implement the following site design measures and/or source control BMPs and/or treatment control BMPs to reduce potential pollutants to the maximum extent practicable from entering storm water runoff: potentially include, during construction, silt fence, fiber rolls, street sweeping/vacuuming, storm drain inlet protection, stockpile/solid waste/concrete waste management, stabilized construction entrance/exit, dewatering/paving/ grinding operations, vehicle/equipment maintenance areas, erosion control mats/spray-on applications, spill prevention/control, desilting basin, gravel bag berm, sandbag barrier, water conservation practices, and revegetation of disturbed areas. Additionally, postconstruction BMPs proposed are minimizing impervious areas, landscaping of slopes and common areas, monitoring of irrigation system, riprap at storm drain outfalls to reduce velocities, homeowner education, warning stenciled at storm drain inlets, bioswales and hydro-cartridge filtration. These measures will enable the project to meet waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP).

Finally, the project's conformance to the waste discharge requirements listed above ensures the project will not create cumulatively considerable water quality impacts related to waste discharge because, through the permit, the project will conform to Countywide watershed standards in the JURMP and SUSMP, derived from State regulation to address human health and water quality concerns. Therefore, the project will not contribute to a cumulatively considerable impact to water quality from waste discharges.

•	Is the project tributary to an already impaired water body, as listed on the C Water Act Section 303(d) list? If so, could the project result in an increase pollutant for which the water body is already impaired?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project lies in the 905.23/Felicita hydrologic subarea, within the San Dieguito hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2003, a portion of this watershed at the Pacific Ocean and San Dieguito River is impaired for coliform bacteria. Constituents of concern in the San Dieguito watershed include coliform bacteria, nutrients, sediment, lowered dissolve oxygen, and trace metals.

The project proposes the following activities that are associated with these pollutants: construction activities and rural residential uses, such as lawn/pool care, pet wastes, etc. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: potentially include, during construction, silt fence, fiber rolls, street sweeping/vacuuming, storm drain inlet protection, stockpile/solid waste/concrete waste management, stabilized construction entrance/exit, dewatering/paving/ grinding operations, vehicle/equipment maintenance areas, erosion control mats/spray-on applications, spill prevention/control, desilting basin, gravel bag berm, sandbag barrier, water conservation practices, and revegetation of disturbed areas. Additionally, post-construction BMPs proposed are minimizing impervious areas, landscaping of slopes and common areas, monitoring of irrigation system, riprap at storm drain outfalls to reduce velocities, homeowner education, warning stenciled at storm drain inlets, bio-swales and hydro-cartridge filtration.

The proposed BMPs are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County Storm Water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse

effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm Water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

, ,	Could the proposed project cause or co surface or groundwater receiving water beneficial uses?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the 905.23/Felicita hydrologic subarea, within the San Dieguito hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply, industrial service supply; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; estuarine habitat; marine habitat; preservation of biological habitats of special significance; migration of aquatic organisms; and, rare, threatened, or endangered species habitat.

The project proposes the following potential sources of polluted runoff: construction activities and rural residential uses, such as lawn/pool care, pet wastes, etc. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: potentially include, during construction, silt fence, fiber

rolls, street sweeping/vacuuming, storm drain inlet protection, stockpile/solid waste/concrete waste management, stabilized construction entrance/exit, dewatering/paving/ grinding operations, vehicle/equipment maintenance areas, erosion control mats/spray-on applications, spill prevention/control, desilting basin, gravel bag berm, sandbag barrier, water conservation practices, and revegetation of disturbed areas. Additionally, post-construction BMPs proposed are minimizing impervious areas, landscaping of slopes and common areas, monitoring of irrigation system, riprap at storm drain outfalls to reduce velocities, homeowner education, warning stenciled at storm drain inlets, bio-swales and hydro-cartridge filtration.

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

,	Substantially deplete groundwater supp groundwater recharge such that there was lowering of the local groundwater table existing nearby wells would drop to a lesuses or planned uses for which permits	vould be leve vel wh	be a net deficit in aquifer volume or I (e.g., the production rate of pre- nich would not support existing land
	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact

Discussion/Explanation:

No Impact: The project will obtain its water supply from the Rincon Del Diablo Municipal Water District and the City of Escondido that obtain water from surface reservoirs or other imported water source. The project will not use any groundwater for any purpose, including irrigation, domestic or commercial demands. In addition, the project does not involve operations that would interfere substantially with groundwater recharge including, but not limited to the following: the project does not involve regional diversion of water to another groundwater basin; or diversion or channelization of a stream course or waterway with impervious layers, such as concrete lining or culverts, for substantial distances (e.g. ¼ mile). These activities and operations can substantially affect rates of groundwater recharge. Therefore, no impact to groundwater resources is anticipated.

e) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?

	nitial Study, 2RPL, Log No.04-08-010	- 28 -	August 24, 2006	
	Potentially Significant Impact	\checkmark	Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated		No Impact	
Discuss	ion/Explanation:			
As outling prepare control, from eror runoff: discharge and Reconstruction No. 200 Manage (SUSMI that will process drainage implement results and seconstruction of the content of the con	ned in the Storm Water Management of by REC Consultants, the project and treatment control BMPs to recosion or siltation, to the maximum of these measures will control erosing requirements as required by the development Component of the Sanatement Program (JURMP) and Start P). tl tl	f) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?			
	Potentially Significant Impact	\checkmark	Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated		No Impact	
Discuss	Discussion/Explanation:			
Less Th	nan Significant Impact: The prop	oosed proje	ect will not significantly alter	

established drainage patterns or significantly increase the amount of runoff for the following reasons, based on a Preliminary Drainage Study prepared by REC Consultants on May 20, 2005:

- Drainage will be conveyed to natural drainage channels and approved drainage facilities.
- The project will not increase water surface elevation in a watercourse with a watershed equal to or greater one square mile by one foot or more in height.
- The project will not increase surface runoff exiting the project site equal to or greater than one cubic foot/second.

Therefore, the project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding onor off-site. Moreover, the project will not contribute to a cumulatively considerable alteration or a drainage pattern or increase in the rate or amount of runoff, because the project will substantially increase water surface elevation or runoff exiting the site, as detailed above.

Create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discu	ssion/Explanation:			
Less Than Significant Impact: The proposed project will not contribute runoff water or significantly increase the amount of runoff that would exceed the capacity of existing or planned stormwater drainage systems based on a Preliminary Drainage Study prepared by REC Consultants on May 20, 2005. Existing substandard receiving drainage systems will be upgraded to adequately convey the offsite and project-related drainages. The proposed additional culverts beneath Miller Avenue will disperse runoff over a wider area, decreasing the overall velocity of stormwater exiting the system.				
h)	Provide substantial additional sources or	f pollu	ted runoff?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				

Less Than Significant Impact: The project proposes the following potential sources of polluted runoff: construction activities and rural residential uses, such as lawn/pool care, pet wastes, etc. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in runoff to the maximum extent practicable: potentially include, during construction, silt fence, fiber rolls, street sweeping/vacuuming, storm drain inlet

protection, stockpile/solid waste/concrete waste management, stabilized construction entrance/exit, dewatering/paving/ grinding operations, vehicle/equipment maintenance areas, erosion control mats/spray-on applications, spill prevention/control, desilting basin, gravel bag berm, sandbag barrier, water conservation practices, and revegetation of disturbed areas. Additionally, post-construction BMPs proposed are minimizing impervious areas, landscaping of slopes and common areas, monitoring of irrigation system, riprap at storm drain outfalls to reduce velocities, homeowner education, warning stenciled at storm drain inlets, bio-swales and hydro-cartridge filtration. Refer to VIII Hydrology and Water Quality Questions a, b, c, for further information.

ĺ	Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map, including County Floodplain Maps?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	sion/Explanation:				
Less Than Significant: Drainage swales that have a watershed greater than 25 acres were identified on or adjacent to the project site. However, the project is not proposing to place structures with a potential for human occupation within these areas and will not place access roads or other improvements which will limit access during flood events or affect downstream properties.					
j) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				

Less Than Significant: The project site contains drainage swales, which are identified as being 100-year flood hazard areas. However, the project is not proposing to place structures, access roads or other improvements which will impede or redirect flood flows in these areas.

k) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?

	nitial Study, 2RPL, Log No.04-08-010	- 31 -	August 24, 2006
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
includin County. that cou		for a major ated immed Therefore, t	dam/reservoir within San Diego liately downstream of a minor dam he project will not expose people to
l) I	nundation by seiche, tsunami, or r	mudflow?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
i. §	SEICHE		
-	act: The project site is not locate e, could not be inundated by a se	_	shoreline of a lake or reservoir;
ii. T	TSUNAMI		
-	act: The project site is located m f a tsunami, would not be inundate		mile from the coast; therefore, in the
iii. N	MUDFLOW		
No Impact: Mudflow is type of landslide. The site is not located within a landslide susceptibility zone. In addition, though the project does propose land disturbance that will expose unprotected soils, the project is not located downstream from unprotected, exposed soils within a landslide susceptibility zone. Therefore, it is not anticipated that the project will expose people or property to inundation due to a mudflow.			
	ND USE AND PLANNING Wou Physically divide an established co		ct:
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The project does not propose the introducing new infrastructure such major roadways or water supply systems, or utilities to the area. Therefore, the proposed project will not significantly disrupt or divide the established community.

b)	Conflict with any applicable land use pla jurisdiction over the project (including, b plan, local coastal program, or zoning of avoiding or mitigating an environmental	ut not rdinan	limited to the general plan, specific ice) adopted for the purpose of
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The proposed project is subject to the Regional Land Use Element Policy 1.1 Current Urban Development Area (CUDA) and General Plan Land Use Designation (1) Residential. The General Plan requires minimum gross parcel sizes of 1 acre and not more than 1 dwelling units per acre. The proposed project has gross parcel sizes and density that are consistent with the General Plan. The project is subject to the policies of the North County Metropolitan Subregional Plan, which encourages one-acre residential lots. The proposed project is consistent with the policies of this plan. The current zone is A70, which requires a net minimum lot size of one acre. The proposed project is consistent with the Zoning Ordinance requirements for minimum lot size.

X. MINERAL RESOURCES -- Would the project:

]	
a)	Result in the loss of availability of a value to the region and the residents		
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: Although the project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego Production-Consumption Region, 1997) as an area of undetermined mineral resources MRZ-3, it has been determined that the site is not located within an alluvial river valley or underlain by coastal marine/non-marine granular deposits. Therefore, no potentially significant loss of availability of a known mineral resource of value to the region and the

residents of the state will occur as a result of this project. Moreover, if the resources are not considered significant mineral deposits, loss of these resources cannot contribute to a potentially significant cumulative impact.

b)	Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	ssion/Explanation:			
No Impact: The project site is zoned A70 – Limited Agriculture, which is not considered to be an Extractive Use Zone (S82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000). Therefore, no potentially significant loss of availability of a known mineral resource of locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan will occur as a result of this project.				
 XI. NOISE Would the project result in: a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? 				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

Less Than Significant Impact: The project is a residential subdivision and will be occupied by residents. Based on a site visit completed by Maggie Loy on April 13, 2004, the surrounding area supports residences and agricultural operations and is occupied by residents and workers. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

General Plan – Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive areas to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A),

modifications must be made to the project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Project implementation is not expected to expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). This is based on staff's review of projected County noise contour maps (CNEL 60 dB(A) contours). Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Noise Ordinance - Section 36-404

Non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The site is zoned A70 that has a one-hour average sound limit of 50 dB(A) from 7:00 a.m. to 10:00 p.m. and 45 dB(A) from 10:00 p.m. to 7:00 a.m. The adjacent properties are zoned A70 and RR1 and have the same one-hour average sound limits. Based on review by staff, the project's noise levels are not anticipated to impact adjoining properties or exceed County Noise Standards, which is 47.5 dB(A), because the project does not involve any noise producing equipment that would exceed applicable noise levels at the adjoining property line.

Noise Ordinance – Section 36-410

The project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-410). Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, It is not anticipated that the project will operate construction equipment in excess of an average sound level of 75 dB between the hours of 7:00 AM and 7:00 PM.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

D)	groundborne noise levels?	on of exce	ssive groundborne vibration or
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes residences where low ambient vibration is essential for interior operation and/or sleeping conditions. However, the facilities are setback 200 feet from any public road or transit Right-of-Way with projected noise contours of 65 dB or more; any property line for parcels zoned industrial or extractive use; or any permitted extractive uses. A setback of 200 feet ensures that the operations do not have any chance of being impacted by groundborne vibration or groundborne noise levels (Harris, Miller Miller and Hanson Inc., *Transit Noise and Vibration Impact Assessment* 1995). In addition, the setback ensures that the project will not be affected by any past, present or future projects that may support sources of groundborne vibration or groundborne noise.

Also, the project does not propose any major, new or expanded infrastructure such as mass transit, highways or major roadways or intensive extractive industry that could generate excessive groundborne vibration or groundborne noise levels and impact vibration sensitive uses in the surrounding area.

Therefore, the project will not expose persons to or generate excessive groundborne vibration or groundborne noise levels on a project or cumulative level.

,	A substantial permanent increase in ambove levels existing without the project	noise levels in the project vicinity
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: construction activities. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on review of the project by County staff. Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an increase of 10 dB is perceived as twice as loud and is perceived as a significant increase in the ambient noise level.

The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose

existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

d)	A substantial temporary or periodic increvicinity above levels existing without the	• •
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting, drilling, grinding, or blasting of raw materials; truck depots, transfer stations or delivery areas; or outdoor sound systems.

Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-410), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of 75 dB for more than an 8 hours during a 24-hour period. Therefore, the project would not result in a substantial temporary or periodic increase in existing ambient noise levels in the project vicinity.

e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	
	☐ Potentially Significant Impact	Less than Significant Impact

Potentially Significant Unless
Mitigation Incorporated

No Impact

Discussion/Explanation:

No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports or within 2 miles of a public airport or public use airport. Therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.

	nitial Study, - 37 2RPL, Log No.04-08-010	-	August 24, 2006

	i. Fire protection?				
	ii. Police protection?				
	iii. Schools?				
	iv. Parks?				
	v. Other public facilities?				
	Potentially Significant Impact	\checkmark	Less than Significant Impact		
	Potentially Significant Unless		No Impact		
Ш	Mitigation Incorporated	Ц	No Impact		
Discus	ssion/Explanation:				
	•				

Less Than Significant Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities. Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts: Rincon Del Diablo Municipal Water District, City of Escondido (water and contract fire services), Escondido Union High School District and Escondido Union School District. Pursuant to the service availability form, the water district must annex a portion of the project and water pipes must be extended to the site. However, as outlined in this Environmental Analysis Form Section I-XVII, the new and/or altered facilities will not result in adverse physical effect on the environment. The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any

- 39 -

public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

XIV. RECREATION

, (Would the project increase the use of expension of the content of	_	0 .
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves a residential subdivision that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to pay fees. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts. including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

There is an existing surplus of County Regional Parks. Currently, there is over 21,765 acres of regional parkland owned by the County, which far exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive surplus of existing publicly owned lands that can be used for recreation the project will not result in substantial physical deterioration of regional recreational facilities or accelerate the deterioration of regional parkland. Moreover, the project will not result any cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant surplus of regional recreational facilities will remain.

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		
No Impact: The project does not include recreational facilities or require the construction or expansion of recreational facilities. Therefore, the construction or expansion of recreational facilities cannot have an adverse physical effect on the environment.			
a)	RANSPORTATION/TRAFFIC Was Cause an increase in traffic which load and capacity of the street system either the number of vehicle trips, congestion at intersections)?	is substanti tem (i.e., re	al in relation to the existing traffic sult in a substantial increase in
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	☑	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant:

DIRECT IMPACT:

A Traffic Impact Study, dated (revised) June 1, 2005, prepared by Darnell and Associates on file with the Department of Planning and Land Use, was completed for the proposed project. The Traffic Impact Study concluded that the proposed project will result in an additional 120 ADT. The addition of 120 ADT will not result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: The proposed project would not result in a degradation of the L.O.S. of affected roadways. Miller Avenue and Alexander Drive are publicly maintained, non-circulation element roads, and Level of Service Criteria does not apply. Therefore, the project will not have a significant direct project level impact increase in traffic, which is considered substantial in relation to existing traffic load and capacity of the street system.

August 24, 2006

CUMULATIVE IMPACTS:

The County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, State, and Federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates 120 ADT. These trips will be distributed on circulation element roadways in the County that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

,	established by the County congestion management agency and/or as identify by the County of San Diego Transportation Impact Fee Program for designation roads or highways?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				

Potentially Significant Impact Unless Mitigation Incorporated:

DIRECT IMPACT:

A Traffic Impact Study, dated (revised) June 1, 2005, prepared by Darnell and Associates on file with the Department of Planning and Land Use, was completed for

the proposed project. The Traffic Impact Study concluded that the proposed project will result in an additional 120 ADT. The addition of 120 ADT will not result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: The proposed project would not result in a degradation of the L.O.S. of affected roadways. Miller Avenue and Alexander Drive are publicly maintained, non-circulation element roads, and Level of Service Criteria does not apply. Therefore, the project will not have a significant direct project level impact increase in traffic, which is considered substantial in relation to existing traffic load and capacity of the street system.

CUMULATIVE IMPACTS:

The County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, State, and Federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates 120 ADT. These trips will be distributed on circulation element roadways in the County that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

For projects that will require building permits-

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will pay the TIF prior to obtaining building permits.

August 24, 2006

For projects that will not require building permits-

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will be conditioned pay the TIF prior to Final Map (or Use and Reliance on the Permit). Result in a change in air traffic patterns, including either an increase in traffic c) levels or a change in location that results in substantial safety risks? Potentially Significant Impact Less than Significant Impact Potentially Significant Unless No Impact Mitigation Incorporated Discussion/Explanation: **No Impact:** The proposed project is located outside of an Airport Master Plan Zone and is not adjacent to any public or private airports; therefore, the project will not result in a change in air traffic patterns. d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? Potentially Significant Impact ✓ Less than Significant Impact Potentially Significant Unless No Impact Mitigation Incorporated Discussion/Explanation: **Less Than Significant:** The proposed project will not significantly alter traffic safety on Miller Avenue or Alexander Drive. Safe and adequate sight distance shall be required at all driveways and intersections to the satisfaction of the Director of the Department of Public Works. All road improvements will be constructed according to the County of San Diego Public and Private Road Standards. Roads used to access the proposed project site will be brought up to County standards. The proposed project will not place incompatible uses (e.g., farm equipment) on existing roadways. Therefore, the proposed project will not significantly increase hazards due to design features or incompatible uses. Result in inadequate emergency access? e) ✓ Less than Significant Impact ☐ Potentially Significant Impact Potentially Significant Unless No Impact Mitigation Incorporated

Discussion/Explanation:

Less Than Significant: The proposed project will not result in inadequate emergency access. The Rincon Del Diablo Municipal Water District, which contracts with the City of Escondido for fire services, has reviewed the proposed project and associated emergency access roadways and has determined that there is adequate emergency fire access proposed. Additionally, roads used will be required to be improved to County standards.

a)	TILITIES AND SERVICE SYSTEMS N Exceed wastewater treatment requireme Quality Control Board?		• •	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Mitigation Incorporated

Discussion/Explanation:

Less Than Significant Impact: The project proposes to discharge domestic waste to on-site wastewater systems (OSWS), also known as septic systems. The project involves a septic system located on each of the nine lots. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards, including the Regional Basin Plan and the California Water Code. California Water Code Section 13282 allows RWQCBs to authorize a local public agency to issue permits for OSWS "to ensure that systems are adequately designed, located, sized, spaced, constructed and maintained." The RWQCBs with jurisdiction over San Diego County have authorized the County of San Diego, Department of Environmental Health (DEH) to issue certain OSWS permits throughout the County and within the incorporated cities. DEH has reviewed the OSWS lay-out for the project pursuant to DEH, Land and Water Quality Division's, "On-site Wastewater Systems: Permitting Process and Design Criteria." DEH approved the project's OSWS on March 16, 2005. Therefore, the project is consistent with the wastewater treatment requirements of the RWQCB as determined by the authorized, local public agency.

f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?

CEQA Initial Study, TM 5362RPL, Log No.04-08-010		- 47 -	August 24, 2006		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				
Less Than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). There are five, permitted active landfills in San Diego County with remaining capacity. Therefore, there is sufficient existing permitted solid waste capacity to accommodate the project's solid waste disposal needs.					
•	g) Comply with federal, state, and local statutes and regulations related to solid waste?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discussion/Explanation:					

Less than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). The project will deposit all solid waste at a permitted solid waste facility and therefore, will comply with Federal, State, and local statutes and regulations related to solid waste.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE:

Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

CEQA Initial Study, TM 5362RPL, Log No.04-08-010		- 48 -	August 24, 2006	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
Per the instructions for evaluating environmental impacts in this Initial Study, the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts, this evaluation considered the projects potential for significant cumulative effects. There is no impact to biological resources; however, the impact on cultural resources is less clear. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes a condition that a monitor be present when grading is performed. As a result of this evaluation, there is no substantial evidence that, after mitigation, significant effects associated with this project would result. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.				
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				
The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:				

PROJECT NAME	PERMIT/MAP NUMBER
San Diego Khanigahi	P02-020
Grubbs	TPM 20478
C.K. Chen Enterprises	TPM 20075
Baroudi	TPM 20884

Potentially Significant Unless Mitigation Incorporated: Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to cumulative traffic. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes payment of Transportation Impact Fee when building permits are pulled. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

	□	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

Potentially Significant Unless Mitigation Incorporated: In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to cumulative traffic impacts. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee when building permits are pulled. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

XVIII. REFERENCES USED IN THE COMPLETION OF THE INITIAL STUDY CHECKLIST

All references to Federal, State and local regulation are available on the Internet. For Federal regulation refer to http://www4.law.cornell.edu/uscode/. For State regulation refer to www.leginfo.ca.gov. For County regulation refer to www.amlegal.com. All other references are available upon request.
